

Cultivating Resilience and Innovation in European Agriculture

Exploring Energy Efficiency,

Policy Solutions, and

Stakeholder Collaboration

Welcome to AgEnRes

AgEnRes is an EU project working to help farmers use less fossil energy and fertilisers, which have become risky due to price fluctuations and supply issues.

Through a comprehensive approach and collaboration with stakeholders, we seek to make European farming fossil energy efficient, more financially stable, and friendlier to the environment.

Funding programme:

Horizon Europe

Budget:

4.841.203,33 euro

Duration:

1st January 2024 – 31st December 2027

Meet the partners!

Coordinated by Stichting Wageningen Research
Co-ordinated by: Wageningen University

Get involved!

There will be many opportunities to get involved in AgEnRes, including:

- Participating in workshops,
- Contributing to our stakeholder platform,
- Signing up for the AgEnRes newsletter!
- Following us on social media!

Check all these opportunities out in the QR code below!

The AgEnRes roadmap!

AgEnRes is all about helping farmers to make better decisions and increase resilience against fluctuating fossil energy prices. We are creating **new data and models to support policy design for a more resilient agricultural sector.**

By cultivating resilience and innovation, reducing emissions, and advancing science, we are building a stronger future for farming.
